Starting seeds indoors is not only a great way to trim your garden budget, but also a wonderful way to keep your green thumb growing through winter.

Here are some simple steps for starting seeds indoors:

- **Soil** - be sure to use a soil mix suitable for seeding indoors. **Schultz Seed Starter** is a mix that drains well and has fertilizer added for extra nutrients.
- **Seeds** - Your seed package will tell you everything you need to know, from when to sow the seeds and how deep to sow them. Follow instructions carefully.

**Maintenance** - it's imperative seeds are covered with a humidity dome until they germinate. Once leaves appear the dome can be removed, and lighting becomes important. Our **Jump Start** lighting systems are very affordable and ensure consistent light without the high energy bill.

Jumpstart 2' light system - \$79.99 4' - \$89.99
