

FOR THE BIRDS

Winter is an essential time to provide food and shelter for our local birds. Here are some great products we think backyard birds would appreciate:

Finch Sock Feeder

The finches LOVE this feeder; and so do we! Simply fill the sock with small seeds finches prefer (Niger Seed), close and hang. Absolutely no mess, and backyard bullies such as Blue Jays won't be able to access any of the seed, so finches can feast in peace.

TIP: Another great way to keep the Jays away from other tiny birds is to ensure a source of food; provide them with large peanuts or cobs of corn; we have both available in our **Wild Bird** line of feed.

Feeders

North States feeders not only offer quality resin feeders, but the designs are so unique. Choose from cottages to churches and old fashioned barns in bright colours. Feed the birds while adding a decorative touch to your yard!

Bird Seed Ball Ornaments

Prefer a more natural look when it comes to festive decorating outdoors? Hang these bird seed ornaments from your trees or shrubs. A great gift for your feathered friends
