

# Unique seeds to start early indoors

## Medusa Pepper

A bright and colourful pepper with small narrow peppers. Nice and compact, fruits are multi-coloured and non-burning—child safe! Great for growing indoors.

## Summer Sun Datura

A great indoor plant that if started now, will enjoy the summer outdoors. Cheerful tangerine blooms on huge plants (up to 10 feet at maturity). Should be started about 3 weeks before planting outdoors.

## Ballerina Mix Datura

This dwarf selection of Datura won't take up much space indoors, and will make a fabulous container plant indoors.

## Olive Tree

Ideal for indoor planting and spending summers out on the deck. Leathery grey-green leaves accented by white flowers. Fruiting will take a few seasons.

# Herbs

## Lemongrass

Essential for flavouring Thai dishes, this exotic grass makes a perfect windowsill plant as it's both decorative and delicious.

## Thai Basil

Ideal for Thai and Vietnamese dishes. Start early indoors and move outside for summer. Blooms are a deep red, very attractive.

## Crimson King Basil

This new British introduction has a 100% all purple leaves (old varieties were a mix of purple/green). Very vigorous with a more uniform and tidy growth habit.

Ideal for the winter windowsill, and gorgeous in spring mixed with other herbs outdoors.
